

# TURYN 250

The TURYN collection is distinguished by its sophisticated decorativeness. The gray shades of the fronts -a lighter Craft oak or darker lava colour- already have a decorative texture but adding the stripes of graphite or black glass takes those to another level. The wardrobes vary in width. TURYN 250 is a large piece of furniture that requires a lot of space.

In the picture: frame - lava; front - lava, black glass. Aluminium slides, lower carriages on bearings.
